۱۵	متن زیر را بخوانید و به سوالات به شکل خواسته شده پاسخ دهید. <b>Just imagine how many English dictionaries there are in the world! How do you know which one is the best for you? Let's look at three types of English dictionaries.</b> <b>Bilingual dictionaries:</b> This is probably the first type of dictionary that you bought when you started to study English. Usually, the first half gives the English word along with their meaning in another language, and the second half gives the words in the other language first and then their meanings in English. This kind of dictionary is suitable for those who have just started learning. You can quickly find how to translate a word from your language into English. But sometimes the meaning of the English word is a bit different from the word in the other language. Also this kind of dictionary encourages the students to translate instead of thinking in English. <b>Monolingual dictionaries:</b> These dictionaries use just one language to explain the meanings of the words. These dictionaries are good for students with a more advanced level of English. Monolingual dictionary encourages people to think in English and help them practice their English reading skills. <b>Electronic dictionaries:</b> Both monolingual and bilingual dictionaries are available in electronic format. Electronic dictionaries can be really useful if they are properly used. This is especially true with regard to pronunciation, as they often have an audio feature that lets you hear the word spoken. This lets you check your own pronunciation. 55. Which kind of dictionary is useful for beginners? 56. What does the first half of a bilingual dictionary contain? 57. How many languages are used in a monolingual dictionary to explain the word meanings? 58. A monolingual dictionary improves your English reading skills.                  a. True                  b. False 59. You can correct your pronunciation by using an electronic dictionary                  a. True                  b. False	۴
