۴	<p><b>Reading</b></p> <p>متن زیر را بخوانید و به سؤالات داده شده هر قسمت پاسخ دهید.</p> <p>For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary.</p> <p>When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words <u>they</u> are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.</p> <p><b>True / False</b></p> <p>40. A dictionary is the basic thing for any language class.                      a) True                      b) False</p> <p>41. Students must have more than four dictionaries to learn English                      a) True                      b) False</p>	۱۳
